

SCOUT

Engineering & Consulting

Our Philosophy

Collaborative Wisdom:

Our shared journey to knowledge is realized by honouring Indigenous history, decolonizing, and including traditional practices in our work. We invest in collective learning and education through leading-edge training methods and technology.

Trust Consulting: Our path to trust begins with unbiased listening and sympathetic exchanges. We are mindfully present with our collaborators to innovate through empathetic decision-making.

Technological Stewardship: Our approach embraces the expanding role of engineering in ensuring technology is used to create a more equitable, inclusive, and sustainable future.

Our History

- Established in 2017
- 100% Indigenous-owned firm
- Merge modern engineering, meaningful engagement, project management, and procurement practices with Indigenous wisdom
- Dedicated team of seasoned engineers, environmental professionals, project managers, and community liaisons

Our Approach

Scout's approach is rooted in **respect, reciprocity, and relationship-building**, and commitment to empowering Indigenous Peoples.

We promote sustainable development and address unique challenges facing Indigenous communities by blending design and technical solutions with economic goals.

- We work **hand-in-hand with Indigenous communities**, incorporating their input and ideas throughout the project lifecycle.

- We strive to deliver projects that **resonate with the community and align with their values** and aspirations.

Community
Driven Project
Delivery

Meaningful
Connections

- We **execute meaningful community engagement and consultation** activities demonstrating cultural sensitivity and respect, while maintaining transparent communication.
- We **prioritize the open dialogue and active participation** of Indigenous communities raising their voices and respecting their perspectives.

- We prioritize capacity building including **local labor and equipment** where possible and **offer training opportunities**.
- We are committed to **building up others**.

Project
Partnership
Facilitation

Braid
Indigenous
Knowledge

- We forge partnerships with communities, **braiding their knowledge, skills, and values** into every project.
- We are committed to bringing **Indigenous Knowledge to the forefront**.

A Journey Together

Scout is more than a service provider – we are a partner. We continually and genuinely seek to listen and learn about the unique aspirations and systemic barriers of Indigenous communities.

Our broad service offerings, reputation, and duty to community sovereignty through long-term solutions make us an excellent choice.

Let's collaborate to shape a brighter, more resilient future!

Our Scope of Services

Project Management

Oversee project execution to ensure timely completion, budget compliance, and quality outcomes.

Community Engagement & Communications

Plan, coordinate, and execute various types of community engagement activities.

Training & Development

Develop workshops, training seminars, and offer informal mentoring.

Policy Advisements

Analyze policies affecting Indigenous Communities and recommend actions to align with goals and objectives.

Grant Applications

Provide support with research, writing, budget development, submission, and follow-up support.

Asset Management

Facilitate asset management planning and conduct ACRS/E-ACRS Inspections.

Emergency Response and Recovery

Offer strategic solutions and appropriate resilience strategies to natural disasters.

Surface Water Management

Develop sustainable strategies protecting against flooding and waterborne diseases.

Construction Monitoring

Observe construction activities and progress.

Municipal Infrastructure

Manage design and construction on-reserve infrastructure (i.e., water, wastewater, roads).

Feasibility Studies

Conduct comprehensive studies to assess the economic, environmental, and cultural impact of proposed projects.
